WHAT'S BEING PROPOSED?

The California Department of Toxic Substances Control (DTSC) is requesting public comment on the proposed revisions to the previously approved remedy for soil contamination at the former O'Brien Property (Site). The proposed revisions are described in the Corrective Measures Study Report (CMS Report) submitted by Slough SSF, LLC (Slough) for the Site. Slough is currently developing the Site for use as a biotechnology research and development business park known as Britannia East Grand. The CMS Report proposes to modify the approved remedy at the Site to allow a day-care center in the northwestern area of the Site and incorporate methane mitigation into the Site development. DTSC has also prepared a Notice of Exemption in compliance with the California Environmental Quality Act for this project. DTSC has determined that the activities of this project will not have any negative effects on human health or the environment.

WHY THIS NOTICE?

The purpose of this notice is to provide the public with the opportunity to learn more about the project and to provide comments to DTSC concerning the proposed revised soil remedies described in the CMS Report. Written Comments must be postmarked by August 15, 2006.
